

Did you know
 the design of a dog's nose print is as
 unique as your fingerprint?

...and that Sigma[®] provides a unique design service for primers and probes that can dramatically improve the success of your assays.

Highlights of our comprehensive design services include:

- Probe design: 5' and 3' end design, GC content, melting temperature, secondary structure, and GC content analysis
- Primer design: primer design, analysis, delta G calculation, primer dimer analysis, and primer efficiency analysis
- Probe and primer design: primer design, analysis, delta G calculation, primer dimer analysis, and primer efficiency analysis
- Probe and primer design: primer design, analysis, delta G calculation, primer dimer analysis, and primer efficiency analysis
